

Using FlexPaper Documents

Introduction

FlexPaper versions of our documents are intended to be used on your local intranet or LMS/VLE.

The source files provided should not be distributed directly to your users, instead you should place the source files on your local intranet or LMS/VLE and provide users with links to the FlexPaper documents that they will access through their web browser.

Linking to a FlexPaper Text

Copy / upload the supplied files and folders to your local intranet / VLE. Each FlexPaper document is contained in a folder and is made up of a number of files e.g.

All of these files must be present for the FlexPaper document to function correctly. You should link to the .html file, in this case, LSM201_fp.html.

Client computer requirements

The FlexPaper documents should be accessed via a web browser, all popular browsers are supported. See requirements below.

Browser: Internet Explorer, Firefox, Chrome, Safari

Required Plug-ins: Adobe Flash 10 or greater
